Invoiced Monthly – Pay only for the hours that the robot worker, worked (50% of UK Living wage). OpEx costs.

Return on Investment within an Hour

Are Your Skilled Workers Carrying the Load?

Your workers are your most valuable asset – but are they stuck on low-value tasks like moving materials.

Let Automation do the Heavy Lifting.

Work flow analysis has shown that around 40% of a production workers time is unproductive.

Robot workers don't: need breaks, become distracted or slow down in the afternoon. They can work long shifts, including 24/7.

Efficiency Increases, When Human and Robot Workers Collaborate

Right for SME's who want to begin an automation journey

- test automation on the production line
- incrementally improve productivity levels
- redeploy or upskill existing human workers
- reduce overheads and remain flexible
- reduce injuries
- avoid labour shortage headaches
- outperform competitors

Collecting full & returning empty totes

An automation company that effectively provides Agency Robot workers. When Human and Robot workers collaborate, we create a more positive outcome.

Our aim is to enable any size business to be able to automate. We form a **Partnership**, somebody with **knowledge** to help, who has **skin in the game**. Working together to create **productivity increases** in your business, without risk.

Pick-by-Light

Using lights to direct humans to items which need to be selected, improves efficiency further

Light Pick

Pick-to-Light

Light-Directed Order Picking

Light Trolley

Batch Picking & Sortation

Mobile Put Solution

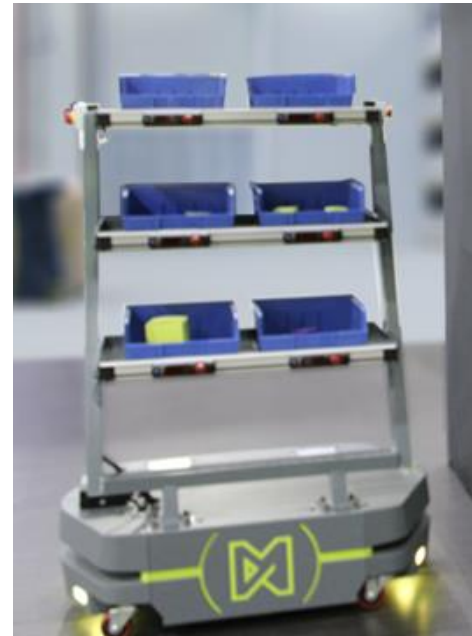

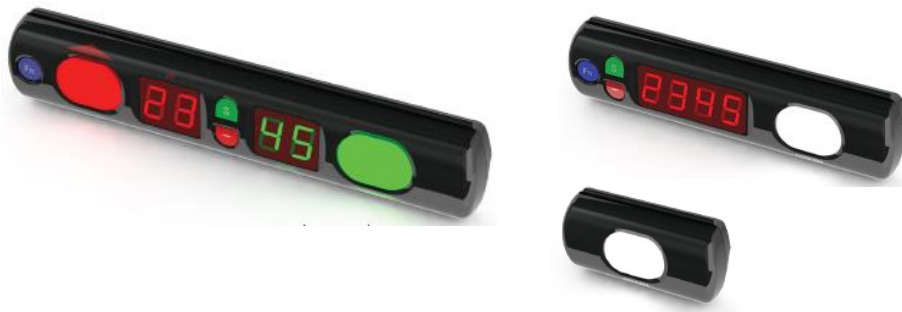

Light Build

Manufacturing cells and Build

Stand-Alone stations

Light directed picking typically doubles, but can triple the pick rate when kitting parts or e-commerce orders

We have a similar “pay per use” model to share further efficiency gains. As with the Robotic Workers, we provide the solution and share the productivity savings with you

Each press of a flashing button, saves 12-20 seconds searching for a “pick”. To kit a batch of parts, locate the flashing lights, pick the qty displayed, then press the button. Virtually no training required!
